

Attention Anglers:

Fort McCoy Fisheries Personnel are currently conducting a tagging study to obtain growth information on various species of fish in Fort McCoy waters. If you catch any fish marked with a blue tag below the dorsal fin, **please do not remove the tag if you intend to release the fish**, and then please record and provide the following:

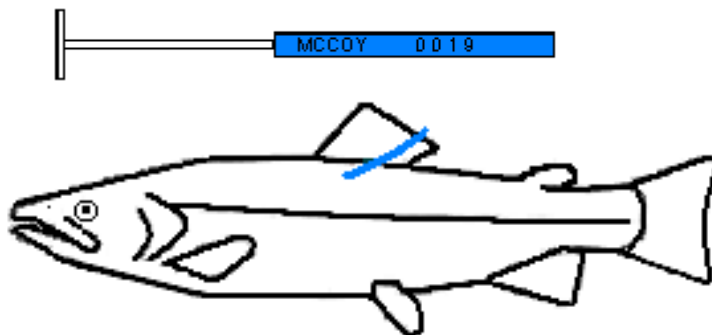

- 1) Tag number (example: MCCOY 14565)
- 2) Fish length to the nearest $\frac{1}{4}$ inch (example: 14 $\frac{3}{4}$ in)
- 3) If the fish was kept or released
- 4) When and where the fish was caught
- 5) Report the fish to Fort McCoy Permit Sales (502-898-3337)

Fort McCoy Permit Sales received a new phone number (listed above). The phone number listed on the tag is no longer valid.

Tags may become coated with algae over time, scraping the algae off will reveal the four or five digit fish identification number.

Your cooperation and support to this project is greatly appreciated.
